Introduction

Adept is purpose-built for **Garment & Made-ups Manufacturers and Exporters** to streamline operations from **Order Booking to Final Dispatch** — managing materials, production, quality and logistics through a modular architecture that supports multiple store types and flexible production processes. Empower your business with real-time insights, advanced reporting and seamless integration for maximum efficiency and measurable success on every order.

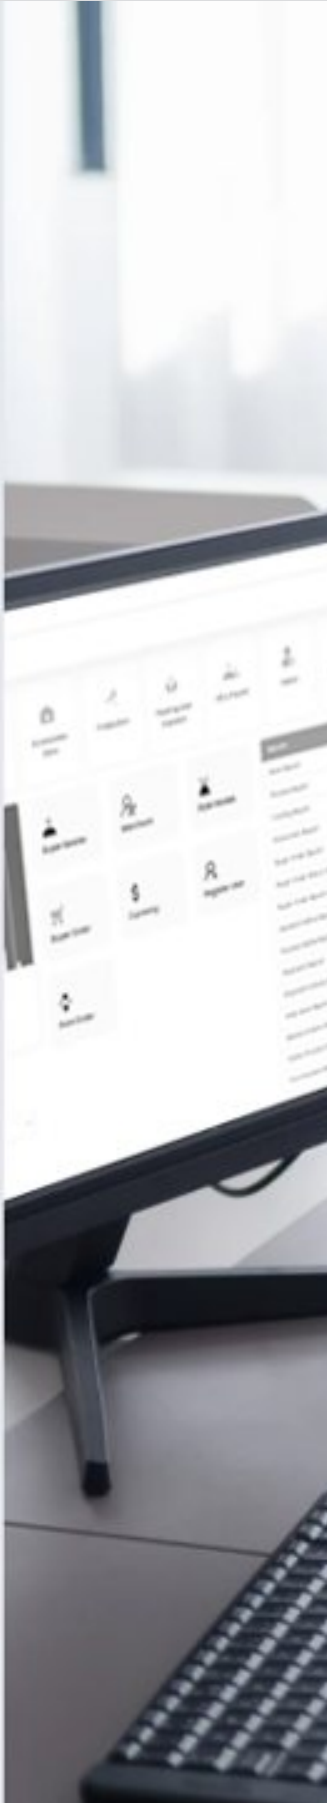

Mission and Vision

→ Mission

Provide an advanced ERP that simplifies and automates every aspect of garment and made-ups manufacturing — from order to dispatch. We enhance productivity, improve inventory and production visibility, ensure regulatory compliance through integrated **E-way Bill** and **E-invoice**, and synchronize financials with **Tally** — so clients can focus on growth and innovation.

→ Vision

Be the most trusted technology partner for garment and made-ups manufacturers, delivering innovative, reliable and scalable ERP solutions. We aim to set industry standards in operational efficiency, compliance and financial integration — helping businesses grow sustainably, compete globally, and embrace digital transformation with confidence.

Modules & Features

→ Order Management

→ Requirement & Planning

→ Purchase & Procurement

→ Production Module

→ Packing & Dispatch

→ Sampling & Merchant Modules

Our Approach

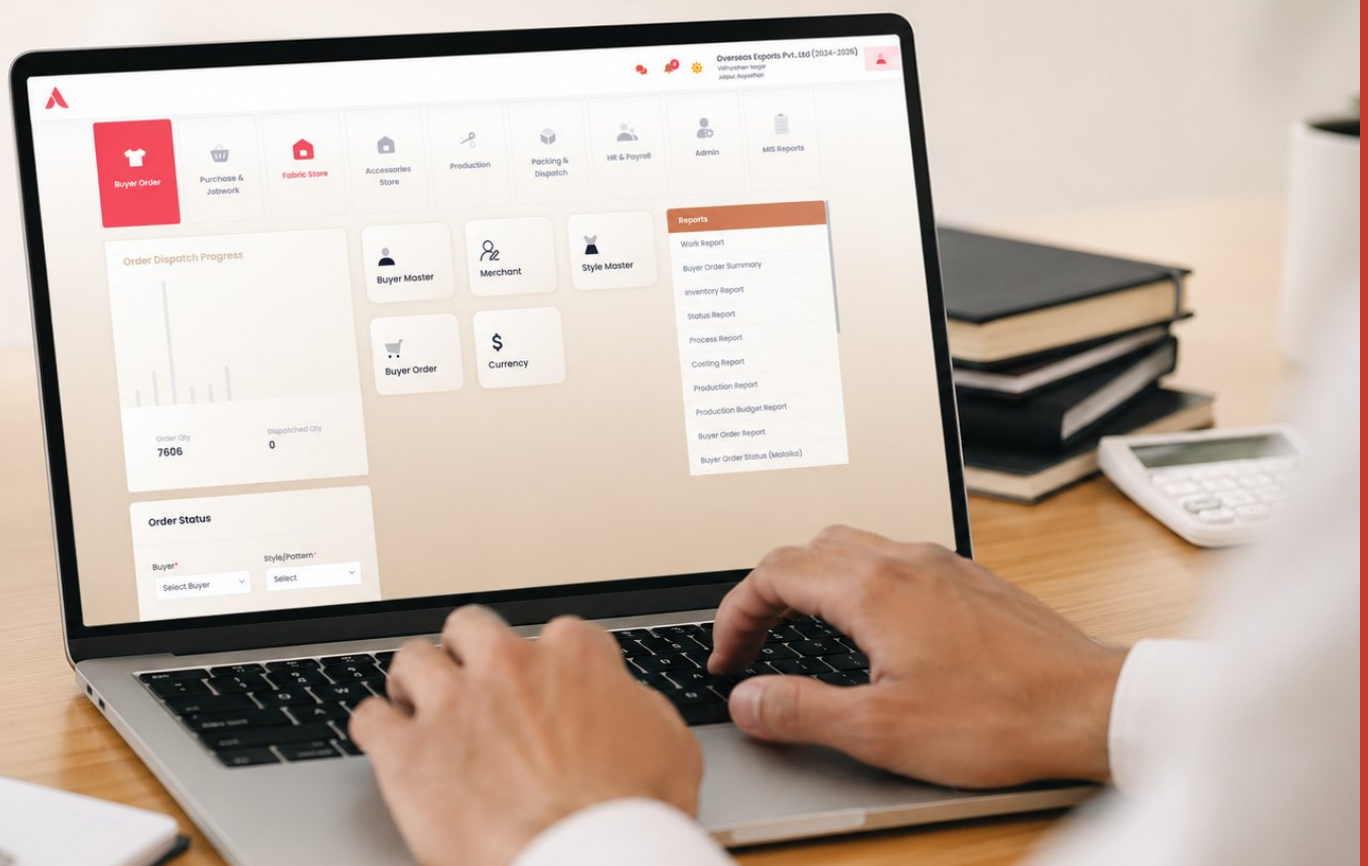

We follow a customer-centric approach focused on understanding the unique requirements of each garment and made-ups manufacturer. Our ERP is modular and scalable, ensuring it adapts to your workflow rather than forcing changes to your processes. We emphasize:

**Client-Centric
Focus**

Ease of Use

**Compliance &
Integration**

**Continuous
Support**

AI-Enabled Workflows

Adept doesn't just store your data — it learns from it. Intelligent recommendations, right inside the screens your team already uses, powered by your own historical data.

→ **Conversational Assistant** ★

- Ask the ERP anything, in English or Hindi — e.g. "overtime for Packing?".
- Attendance, stock, orders and reports answered on demand.
- **Your whole database, one question away.**

→ **Smart Supplier Recommendations**

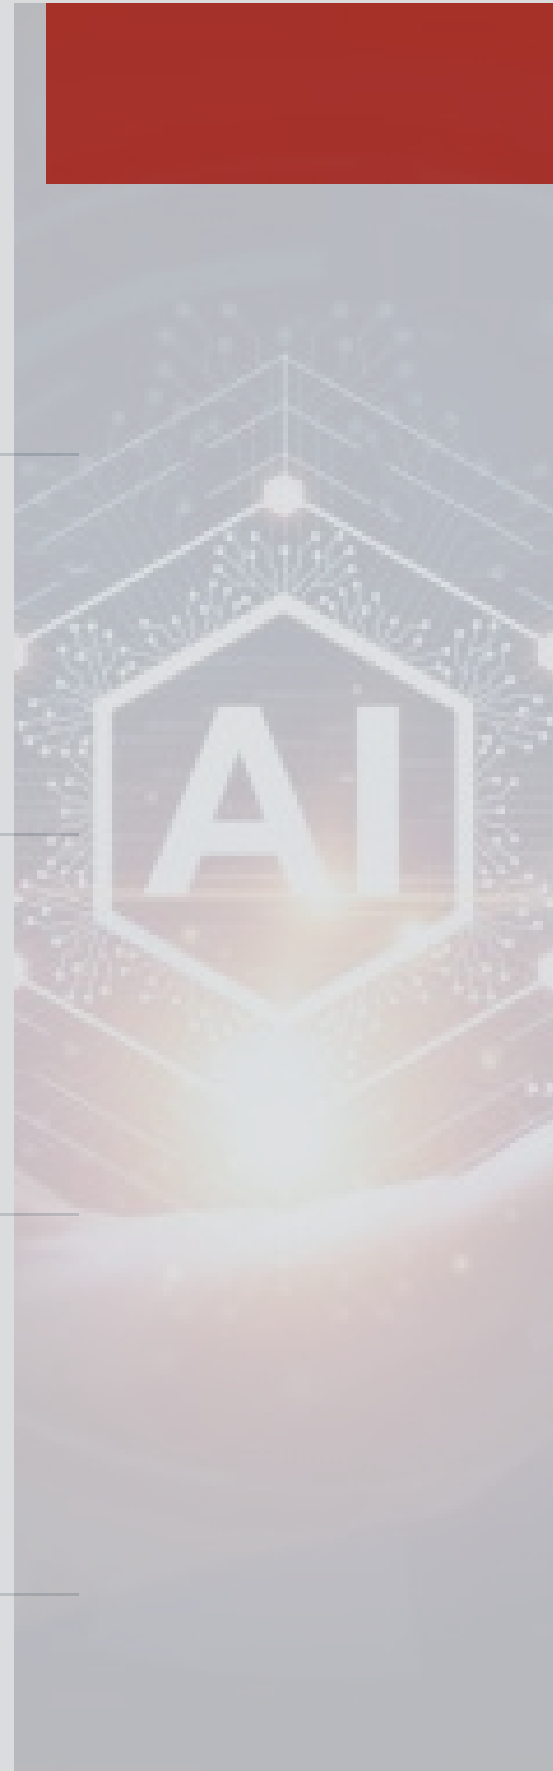

- On every PO, ranks suppliers by best past pricing for the material.
- Weighs on-time delivery reliability, quality scores and order volume.
- **Pick the right supplier in seconds, not hours.**

→ **Intelligent Job-Worker Selection**

- For printing, embroidery, washing and finishing processes.
- Evaluates process performance, cost, lead-time and current workload.
- **Faster allocation, fewer delays, lower rework.**

→ **AI Material Finder & Creator**

- Searches every department for similar items when one isn't found.
- Auto-fills stock type, category and unit, then creates it in one click.
- **No duplicates. No waiting on master data.**

AI-Enabled Workflows

→ Rate Intelligence

- Historical rate trends for the material before you finalize a rate.
- Side-by-side supplier rate comparison and benchmarking against your own buying history.
- **Negotiate with data, not guesswork.**

→ Wastage & Shrinkage Prediction

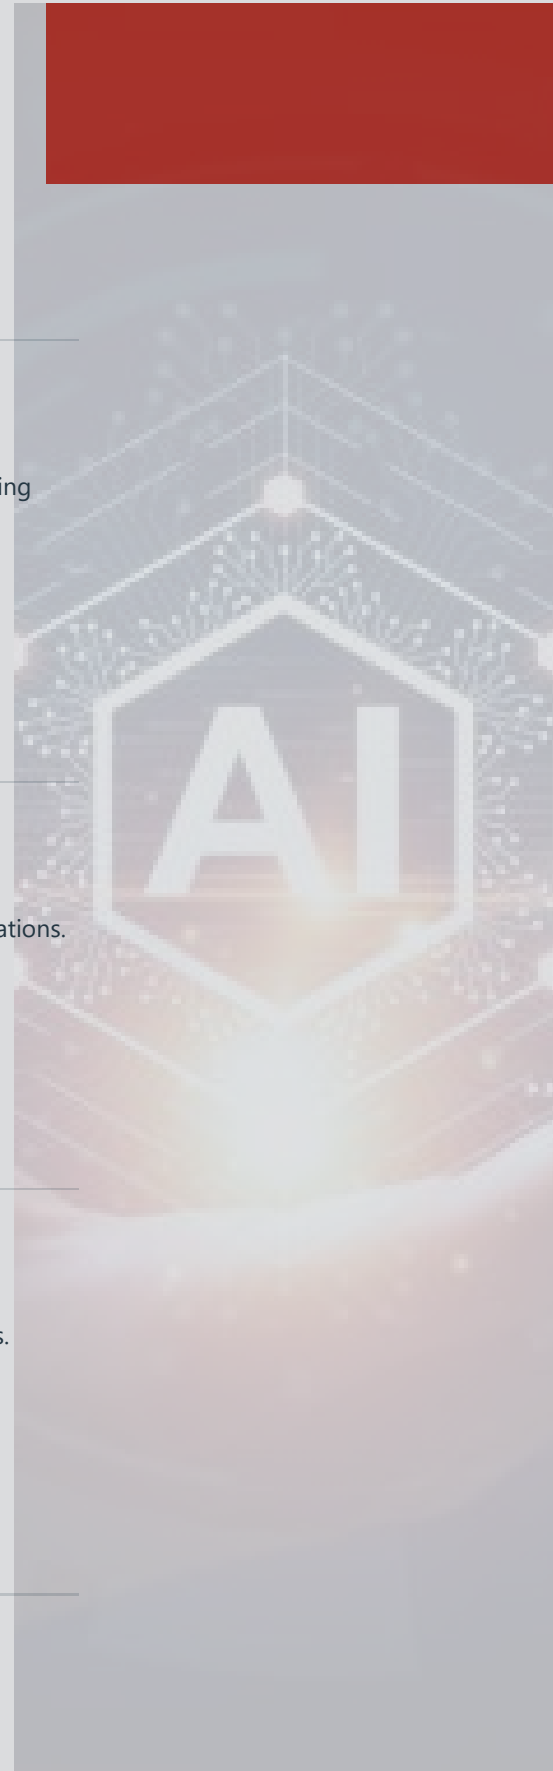

- Predicts expected wastage % per material from style and production history.
- Shrinkage factors by wash type and fabric composition, with buffer recommendations.
- **Order right. Reduce excess. Cut waste costs.**

→ Consumption Forecasting

- Forecasts material needs for upcoming orders from similar past styles.
- Flags reorder points before stock runs out and seasonal demand ahead of peaks.
- **Stay ahead of demand. Never halt for stock-outs.**

→ Smart Stock Allocation

- Recommends the best warehouse or godown to fulfil from.
- Balances availability across branches and minimises stock transfers.
- **Right stock, right branch, less movement.**

About Software

→ Order Management

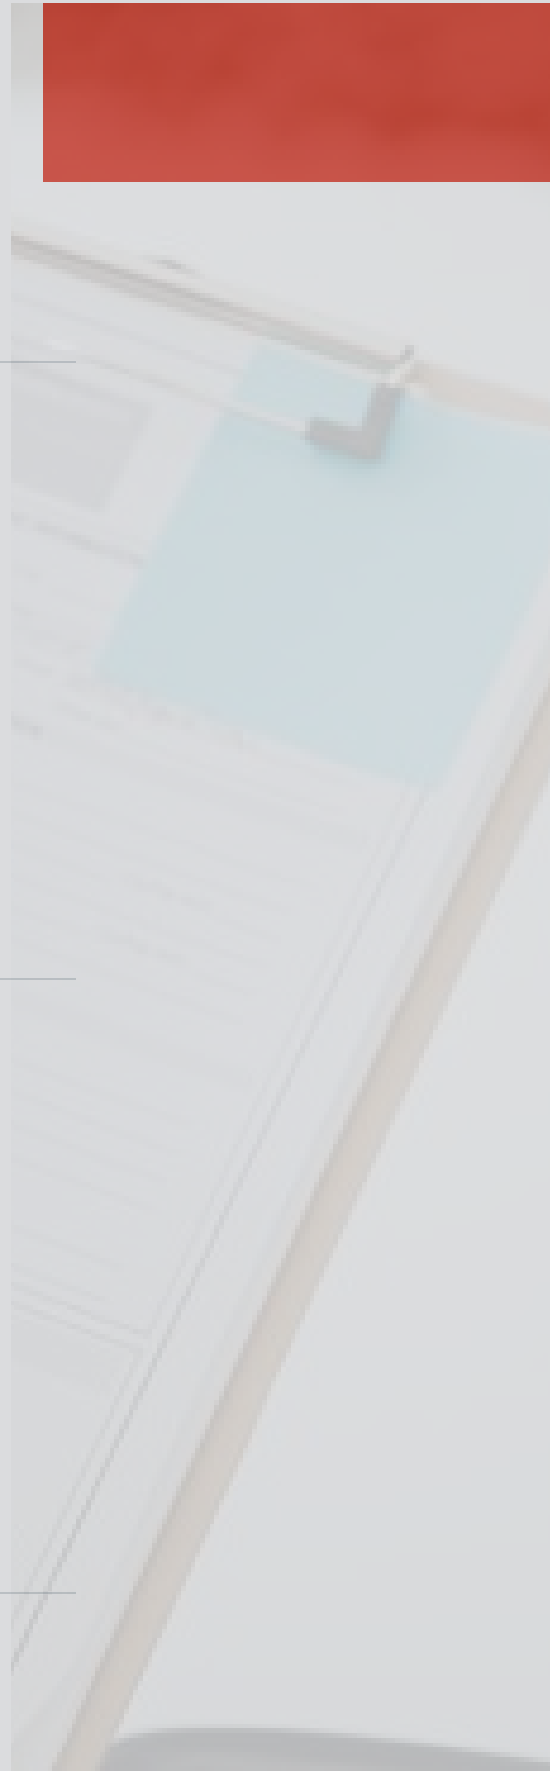

- Manage buyer orders, define materials, processes & material planning.
- Buyer Order Entry (buyer details, order number, schedule, payment terms).
- Style / Product Definition (style code, measurement chart, BOM).
- Material Definition & Planning (fabric, trims, chemicals, consumption).
- Process Planning (Cutting → Stitching → Washing → Finishing → Packing).

→ Material & Inventory Management

- Handle raw material and finished goods with multiple store types.
- Multiple store types: Fabric, Trim, Chemical, Accessories, Finished Goods.
- Inventory operations: Receipts, Issues, Returns, Transfers.
- Inventory Valuation Methods: FIFO / LIFO / Weighted Average.
- Stock Alerts & Reports.

→ Purchase & Procurement

- Streamline material sourcing from approved vendors.
- Vendor Management, Purchase Indents, Purchase Orders, GRN, QC.
- Pending PO and Vendor Performance Reports.

About Software

→ **Production Module**

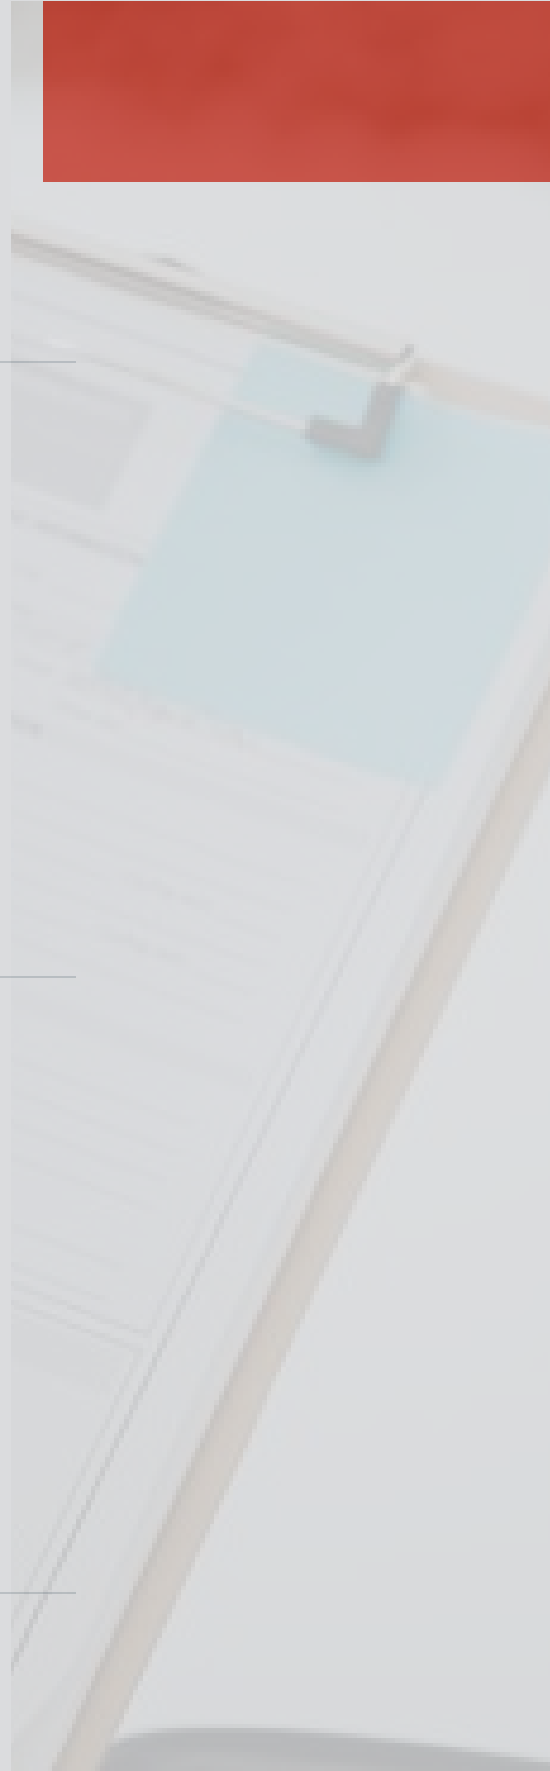

- Manage job work and in-house production for styles.
- Job Work Orders, Style Manufacturing, Department Management.
- Production Tracking (WIP, Output Reporting, Rework).
- Reports: Daily Production Summary, Costing & Efficiency.

→ **Packing & Dispatch**

- Manage packing processes and dispatch.
- Packing Plans (Simple, Blister, Combo).
- Packing Book, Box Sticker Generation, Dispatch Advice.
- Export Invoice & Documentation.

→ **User Management & Security**

- Role-based access (Admin, Purchase, Store, Production, Dispatch).
- User-defined departments (WIP, Cutting, Stitching, Finishing, Packing).
- Audit Trails for all transactions.

Other Highlights

→ Multi-Branch & Warehouse Management

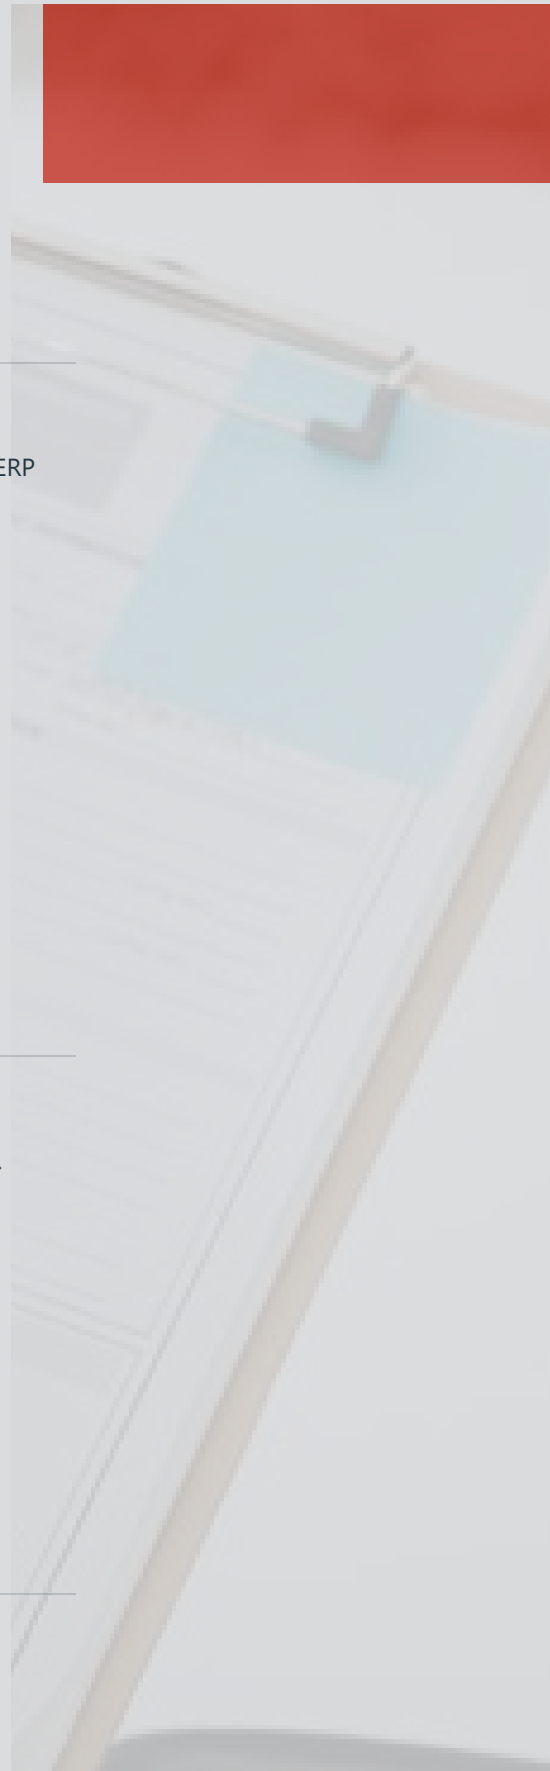

- Manage multiple branches or warehouses of the same company within a single ERP system.
- Maintain separate inventory, purchase, sales and production data for each branch/warehouse.
- Enable inter-branch stock transfers with full tracking and approval.
- Consolidated reporting for all branches while still allowing branch-wise analysis.
- User-level access control for branch-specific operations.

→ E-way Bill & E-invoice

- Automatic generation of E-way Bills for each dispatch as per government norms.
- E-invoice generation and integration with the government GST portal.
- Tracking and reconciliation of E-way Bills and E-invoices within the ERP.

→ Tally Integration

- Automatic posting of sales/purchase invoices into Tally.
- Automatic posting of orders & other challans into Tally.
- Real-time synchronization with Tally for financial accuracy and compliance.
